# International Sourcing

Qualified supplier research and real commercial quotations.

## STARTING PRICE

**Defined sourcing project**

## From $500

Usually one defined product or a closely related product family; final scope agreed first.

## WHAT YOU RECEIVE

- A supplier shortlist matched to your product specifications and qualifications.
- Initial screening for product fit, manufacturing capability and MOQ.
- Direct requests for actual supplier quotations - not invented price estimates.
- A side-by-side comparison of the quotations received, terms and open questions.
- Supplier introductions and next-step recommendations where agreed.

## HOW WE AGREE ON THE SCOPE

You share the product, specifications, target price, order quantity, preferred countries and essential qualifications. We agree on the number of suppliers to approach, screening depth, quotation target, timeline and fee.

## WHAT MAY CHANGE THE PRICE

Complex formulations or custom products, multiple sourcing countries, technical certifications and deeper verification may cost more. Quotations depend on supplier responses; we discuss feasibility before accepting the assignment. Factory audits, samples, testing and certification checks are separate unless included in the proposal.

Your free 30-minute call is for reviewing the requirements and a realistic scope.
